

STEP 2: ADDING OIL

1) Carefully remove the machine back cover using the supplied 2.5mm hex wrench.

2) Carefully remove the upper oil fill plug using the supplied 5mm or 6mm hex wrench.

Add all supplied non-detergent pump oil and replace the upper oil fill plug tightly.

3) Plug female end of AC power cord directly into machine and the other side into an AC outlet.

The MVS 45-Series may need a male plug installed:
Gold Prong = Black,
Silver Prong = White,
Center Prong = Ground.

4) Flip power switch to the ON position and cycle machine a minimum of three times. **BE SURE TO CALIBRATE NEXT.**
